Project Code: IDEA0002 US
Project Name: People's Perception Index
Prepared for: Seema Shah, International IDEA
Interviews: 1500
Field Period: December 11, 2023 – December 19, 2023
Project Manager: Melissa Moore, melissa.moore@yougov.com

=====

This project consisted of YouGov collecting two samples: A General Population sample and a low income oversample (500 respondents). Only the General Population sample was weighted.

General Population Sample matching and weighting description

YouGov interviewed 1059 respondents who were then matched down to a sample of 1000 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame is a politically representative "modeled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, region and 2020 Presidential Vote choice. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2020 turnout, 2020 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

The weighted General Population portion and the unweighted Low Income oversample were added to crunch.

-----	-----	-----
275	1	No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (i.e., who became president or who won the legislative majority)
209	2	Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the election
332	3	It's complicated. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not
217	4	Yes, somewhat. There were deficiencies and some degree of fraud and irregularity but these did not in the end affect the outcome (as defined above)
467	5	Yes. There was some amount of human error and some logistical restrictions but these were largely unintentional and without significant consequences
